About Us

DreamOrbit is an innovation driven software product engineering company. We help enterprises and software companies (ISVs) build innovative solutions that are cross platform enabled and work on cloud based delivery model. We collaborate with our customers to think, design and develop robust software with built in quality, in an engagement model that accelerates development speed and guarantees results. Our expertise areas are –

- ✓ Software Innovation - Our expertise lies in software R&D, system architecture design for large enterprise applications, deployment on production servers, load testing and performance management.

- ✓ Big Data and Cloud - Big Data Analytics is finding its way into the enterprise world in a big way. DreamOrbit helps enterprises uncover the knowledge and latent information, to give the business the competitive advantage over rivals and provide business intelligence

- ✓ Mobile Application Development - Building a mobile application comes with number of challenges like getting the user experience right, including the right set of features, integrating with backend cloud services, performance, cross-device suitability and so on. DreamOrbit can help you in building a mobile strategy in alignment to your product goals.

DreamOrbit is a Red Herring Red Herring Top 100 Asia company. Red Herring's Top 100 Asia list is a mark of distinction for identifying promising new companies. Red Herring editors were among the first to recognize that companies such as Facebook, Twitter, Google, Yahoo, Skype, Salesforce.com, YouTube, and eBay would change the way we live and work. DreamOrbit got this award in recognition of its work on Big Data and Analytics using Cloud.
